

Endless Sexy Conversations

Your DIY Guide

If you've finished going through Innocent Words That Make Her Horny and put some of the text message suggestions to use, you've probably already seen some great results.

But there comes a time when you're going to want to go beyond the scope of what the eBook had to teach you and start writing your own seductive text messages off the cuff.

This bonus was designed to teach you a bit more about the female psychology, as well as teach you what and why women are attracted to certain things so that you'll be able to come up with your own text messages that will turn her on without having to rely on the eBook.

Ready to start constructing your own masterpieces?

The art of text messaging isn't magic or rocket science! All in all, staying in touch with texts is pretty simple.

Be concise and clear. Be smart and sexy. Use the time you have to construct and edit a text message wisely.

Don't send anything before you've had a chance to spell check it. Shortening words such as "you" and "are" by just using the letters "u" and "r" is a huge turn off for women, as it makes you look very immature.

It may not be a big deal to you, but proper spelling and grammar is incredibly important to women. Remember, you're trying to set a certain mood, and if she looks at your messages and thinks that a fourth grader wrote them it's going to turn her off right away and kill the atmosphere all together.

Don't text her multiple times before she's gotten a chance to reply. If she's busy at work with friends, family, or anything else and grabs her phone only to see twenty messages from you, it's going to make you

seem very needy and desperate. However, if you guys are enjoying a back and forth conversation, keep it going for however long feels natural.

The more personality you can put into your messages, the better. Remember, you aren't in the room with your quirky voice, your cute smile, and your infectious laugh. You need to give her everything you can to read your messages in your words.

Build The Intrigue With Details

As I've stated several times in this course, you're trying to paint a picture in her mind that will turn her on.

If there's too few details in your messages, she's not going to be able to envision what you want her to. So rather than saying something such as, "*You looked incredibly sexy in that red dress last*

night", you might want to add some more details by saying something like:

"You looked incredibly sexy in that red dress last night. Right from the minute I saw you all I could think about was getting you alone so I could slowly peel it off of you and explore every inch of your body."

By simply complimenting her dress, you leave nothing for her to imagine or fantasize about. But when you tell her the sensation it's causing you, i.e. the desire to get her alone and peel it off of her, now this forces her to imagine that actually happening.

This is also known as Cause and Effect. And nearly every well written, incredibly sexy text message that you can send her will have these elements to some extent.

Here's another example.

Let's say it's the day after a first date that went well. Rather than just saying, "*I had a great time last night, can't wait to do it again*", try something like this:

“I don’t know what kind of perfume you were wearing last night, but you smelled delicious. I don’t know how I was able to hold back as long as I did before I knew I just had to taste your soft lips. I hope I get to see you again real soon.”

Once again, adding these extra details about you noticing her perfume and the scent being very memorable, the fact that you had to use restraint to hold back before kissing her and the fact that you noticed how soft her lips were gives her the details that she needs to envision kissing you and getting physical with you. You don’t need to go overboard, you’re not Charles Dickens here.

Additionally, giving her too much detail can tend to backfire. If you give her just the right amount of detail, the messages she sends back to you will be very similarly written. And this means that she’s going to need to spend some time thinking about exactly what she wants you to do to her, or her to you. This will force her to envision even more sexual activities happening between the two of you and thus continue to turn her on even more.

Find Her Triggers

There are certain to be some words that your lover reacts to beyond our top 20 list. When you enjoy a bit of pillow talk, sexy emails or even your own sexting, see if there are particular words or phrases she seems to respond to most. Make up your own “go to” list of terms you can use in your own messages to get her all hot and bothered.

Learning to communicate with your lover, whether face to face, in letters, on Facebook or through text messaging, is primarily an exercise in getting to know someone better. How does she prefer to communicate? How much time does she have in the day to spend texting with you?

Does she like to hear from you in the morning as a great start to her day, or in the afternoon as a bit of a pick-me-up? Or does she really just want a short goodnight from you to help her sleep soundly (or maybe a sexier night-time text session to get her nice and relaxed in bed)? Romance or rock-em-sock-em raunchiness, you can deliver with the power of your thumbs if you take the time to perfect your personal style.

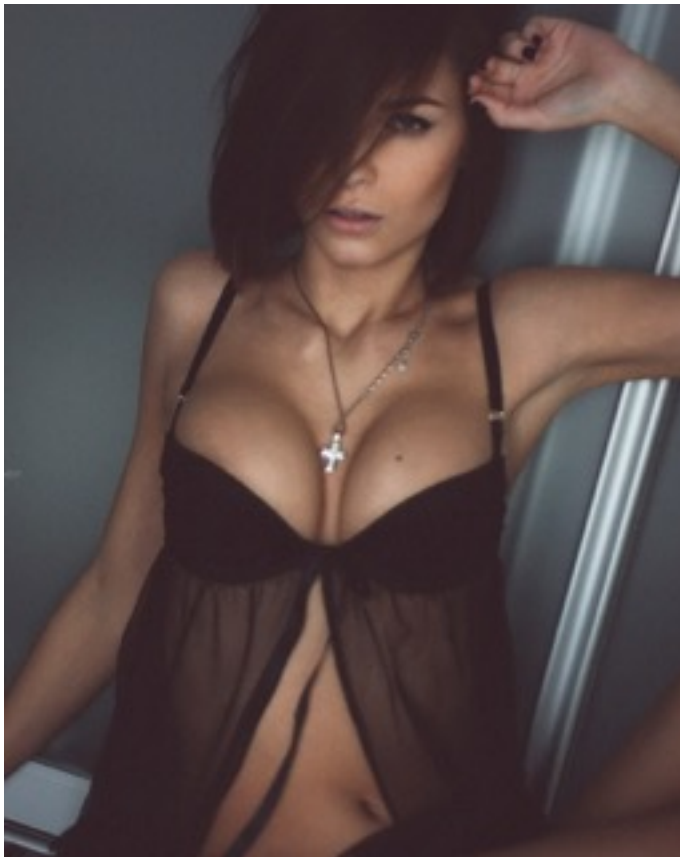

Don't start out all of your conversations in a sexual way. She may not be in the right mood for it.

Also, by making all of your conversations sexual, she's going to assume that's all you're interested in. You don't care about her, you only care about sex.

Try to begin most of your conversations with something a bit more neutral such as asking her how her day is. If she told you she had a long, tiring day at work, you could offer to come over with a bottle of wine and give her a back or foot massage.

Pay Attention To Details

Most of the time, a woman is going to go through a lot of trouble picking out just the right outfit for you, deciding how she wants to do her hair, her makeup, and what perfume she wants to wear. This is all done in hopes of turning you on, and she desperately wants you to acknowledge it.

Make sure to pay extra close attention to some of the smaller details. Is she wearing little angel wing earrings? Does she have her hair up in a bun that looks like it took a while to get just right? Is she wearing a dress that accents certain curves of her body?

Really pay attention to this and make mental notes. Once the date is over and you send her a message, mention how incredible that skirt made her legs look or how well her earrings framed her face and really brought out her eyes.

You have no idea how much this is going to mean to her since you're probably going to be one of the only guys to actually pay attention to the effort she's making. It's going to immediately put you far above all other guys. And who do you think she's going to call when she's hot and horny and just needs to get laid?

The guy that actually pays attention and notices things and shows a real interest in her? Or the schmuck who only cared about looking at her cleavage?

Be Direct And Be Bold

Text messages offer something that no other form of communication ever has. She gets to have a

dirty conversation with you in public, at work, and surrounded by other people without any of them what's really going on.

In a way, this makes you her dirty little secret. And just that thought alone is enough to turn most women on. Imagine how attracted she's going to feel while she's stuck at a boring meeting at work and all of a sudden you start helping her to create this incredible, sexual fantasy.

Maybe you mention how you would love to come over to her office, sweep everything off her desk, and bend her over. Or maybe she's at home relaxing while you're out with your colleagues and tell her that as soon as you have the first opening, you're going to make an excuse to leave so that you can come over and have your way with her. You don't need to say anything too vulgar, but you will want to be a bit more bold and up front than you may normally be when you're talking face to face.

Remember, a great deal of this is building up a fantasy in her head and no fantasy remains completely platonic. You need to feel comfortable adding a sexual element if you want to guide her mind to the bedroom.

Conclusion

As I've stated before a number of times, your words will trigger certain feelings and images in her mind. By using the examples we gave you in the main eBook and following the directions we've laid out here, you should have no problem making her feel the way you want with just a little bit of practice.

And since you'll probably be talking with a number of girls, don't be afraid to take notes or even screenshots when you send her a message that gets a really good reaction. Keep a little database of your best ones, because if you say something that really turns one girl on, there's a good chance that it will turn another girl on just as much.

Okay, that's all for now.

To your sexual future,

Isabella Stone
